

SHELTERING OF ANIMALS

I. GENERAL

The purpose of this section is to provide basic guidelines for the sheltering of small animals (pets) in Sector A and Sector B areas of the Shelter Area Parishes and large animals (equine, livestock) in Sector C of the Shelter Area Parishes. This plan will be activated and coordinated by the Governor's Office of Homeland Security and Emergency Preparedness (GOHSEP).

The Louisiana Veterinary Medical Association (LVMA) has organized Regional Animal Response Teams (RARTs). Under direction of the Louisiana Department of Agriculture and Forestry (LDAF), these teams will be responsible for the operation of small animal shelters within their areas. Neither the Louisiana Shelter Task Force nor the parish OHSEP Director will be responsible for the operation of the small animal shelters.

II. SITUATION AND ASSUMPTIONS

A. SITUATION

Public health during disasters is directly related to the safety of animals. Owners may fail to evacuate because they cannot take their animals with them, or owners who left their animals behind will later try to reenter the disaster area to rescue them. The human-animal bond extends to livestock and equine owners.

B. ASSUMPTIONS

1. Through public education, animal owners will be advised ~~of~~ on how to prepare their animals for a disaster situation.
2. By providing shelters for pets, human lives will be saved.

III. SMALL ANIMALS

- A. Evacuees will be advised of pet shelter locations at the informational points. Informational points will be staffed by RARTs. Along with locations, pet owners will receive requirements for use of the pet shelters.
- B. Local veterinarians and staff, operating as RARTs, will provide veterinary emergency care of the animals as needed. RARTs will be responsible for the initial set up of the

shelter. Stations in the shelter are to include: animal and owner identification, veterinary needs, resource procurement, documentation of activities, and expenses.

- C. The pet shelters will be paired with nearby **American Red Cross (ARC)** shelters where owners will be sheltered. The pet owner will provide daily feeding, watering, **and** exercising of his/her pet and **help** keeping the shelter area clean.
- D. At check-in, the pet owner will be required to show proof of required vaccinations. Pets will be examined, if ~~indicated~~ **necessary**, by a veterinarian. Any pet not having its vaccinations, or considered to pose a risk to other animals or people, will not be admitted to the shelter. The final decision rests with the veterinarian in charge at the shelter.
- E. Pet shelter standard operating procedures are developed and maintained by LVMA.
- F. Staging areas for humane groups will be identified and established by LDAF.
- G. Zoos, animal humane societies, and animal control must have disaster plans and cannot utilize public shelters.

IV. LARGE ANIMALS

Large animals will be sheltered in **Shelter Sector C**. **Humans with large animals owners** need to evacuate early and travel the shortest distance with their animals. LDAF, Office of Animal Health Services will maintain a list of facilities in **Shelter Sector C** that are available for sheltering of large animals. Owners are responsible for moving and caring for their animals.

V. INFORMATION FOR CITIZEN'S

Information for Citizens concerning Pets, Livestock, and Wildlife

Disaster Planning Tips for Pets, Livestock, and Wildlife

The Humane Society of the United States offers disaster planning tips for pets, livestock and wildlife whether it's a large-scale natural catastrophe or an unforeseen emergency that causes you to leave your home temporarily. Everyone's family can benefit from having a household evacuation plan in place before disaster strikes. Every disaster plan must include your pets!

The Humane Society of the United States (HSUS) offers the following tips to pet owners designing an emergency safety plan:

- If you evacuate your home, **DO NOT LEAVE YOUR PETS BEHIND!** Pets most likely cannot survive on their own; and if by some remote chance they do, you may not be able to find them when you return.

- For public health reasons, many emergency shelters cannot accept pets. Find out which motels and hotels in your area allow pets -- well in advance of needing them. Include your local animal shelter's number in your list of emergency numbers -- they might be able to provide information concerning pets during a disaster.
- Make sure identification tags are up to date and securely fastened to your pet's collar. If possible, attach the address and/or phone number of your evacuation site. If your pet gets lost, his tag is his ticket home. Make sure you have a current photo of your pet for identification purposes.
- Make sure you have a secure pet carrier, leash, or harness for your pet so that if he panics, he can't escape.
- Take pet food, bottled water, medications, veterinary records, cat litter/pan, can opener, food dishes, first aid kit, and other supplies with you in case they're not available later. While the sun is still shining, consider packing a "pet survival" kit which could be easily deployed if disaster hits.
- If you are unable to return to your home right away, you may need to board your pet. Most boarding kennels, veterinarians, and animal shelters will need your pet's medical records to make sure all vaccinations are current. Include copies in your "pet survival" kit along with a photo of your pet.
- If it is impossible to take your pet with you to temporary shelter, contact friends, family, veterinarians, or boarding kennels to arrange for care. Make sure medical and feeding information, food, medicine, and other supplies accompany your pet to his foster home. **NOTE:** Some animal shelters will provide temporary foster care for owned pets in times of disaster, but this should be considered only as a last resort.
- If you have no alternative but to leave your pet at home, there are some precautions you must take, but remember that leaving your pet at home alone can place your animal in great danger! Confine your pet to a safe area inside -- NEVER leave your pet chained outside! Place a notice outside in a visible area, advising what pets are in the house and where they are located. Provide a phone number where you or a contact can be reached as well as the name and number of your vet.

Not only are pets affected by disaster, but the other animals in the disaster area are affected as well. The HSUS offers these basic tips for people who encounter wildlife or have livestock on their property:

Wildlife

- Wild animals often seek higher ground which, during floods, eventually become submerged (i.e., island) and the animals become stranded. If the island is large enough and provides suitable shelter, you can leave food appropriate to the species (i.e., sunflower seeds for squirrels). Animals have a flight response and will flee from anyone

approaching too closely. If the animal threatens to rush into the water, back away from the island or you may frighten the animal into jumping into the water to escape from you.

- Wildlife often seek refuge from flood waters on upper levels of a home and may remain inside even after the water recedes. If you meet a rat or snake face to face, be careful but don't panic. Open a window or other escape route and the animal will probably leave on its own. Never attempt to capture a wild animal unless you have the training, protective clothing, restraint equipment and caging necessary to perform the job.
- Beware of an increased number of snakes and other predators who will try to feed on the carcasses of reptiles, amphibians, and small mammals ~~who~~ **that** have been drowned or crushed in their burrows or under rocks.
- Often, during natural disasters, mosquitoes and dead animal carcasses may present disease problems. Outbreaks of anthrax, encephalitis, and other diseases may occur. Contact your local emergency management office for help!
- If you see an injured or stranded animal in need of assistance, or you need help with evicting an animal from your home, please contact your local animal control office or animal shelter!

Livestock

- **EVACUATE LIVESTOCK WHENEVER POSSIBLE.** Arrangements for evacuation, including routes and host sites, should be made in advance. Alternate routes should be mapped out in case the planned route is inaccessible.
- The evacuation sites should have or be able to readily obtain food, water, veterinary care, handling equipment and facilities.
- Trucks, trailers, and other vehicles suitable for transporting livestock (appropriate for transporting each specific type of animal) should be available along with experienced handlers and drivers to transport them. Whenever possible, the animals should be accustomed to these vehicles in advance so they're less frightened and easier to move.
- If evacuation is not possible, a decision must be made whether to move large animals to available shelter or turn them outside. This decision should be determined based on the type of disaster and the soundness and location of the shelter (structure).

All animals should have some form of identification that will help facilitate their return.

VI. ANIMAL CONTACTS

State Agencies:

State Veterinarian (Office of Animal Services, Department of Agriculture & Forestry)	925-3980
Area Veterinarian-in-Charge: (USDA: APHIS: VS)	389-0436
