

January 1, 2010

Dear Citizens of East Baton Rouge Parish:

The purpose of this pamphlet is to provide a brief summary of selected highlights from the operating budgets for the year 2010.

The legal framework for financial management of the City of Baton Rouge and Parish of East Baton Rouge (City-Parish) is largely established in the *Plan of Government* approved by local voters in 1947. That plan requires the adoption of annual operating budgets for various governmental functions. In accordance with this Plan of Government, the local government in December 2009 adopted annual operating budgets for the year 2010. At that time, a \$283 million general operations budget was approved, along with a number of budgets for special operations, for a grand total of \$701 million, excluding transfers from other funds. All of the annual budgets referred to above are published in a document entitled *2010 Annual Operating Budget*, which is available for review by the public at parish libraries and at the City-Parish Finance Department – Budgeting Division located at 222 St. Louis Street, Baton Rouge, Room 452 (phone 389-3067). The budget document is also available online at [www.brgov.com/dept/finance](http://www.brgov.com/dept/finance).

The City-Parish has separate budget processes for some state and federal grant programs, as well as for capital improvement programs such as street construction and public building construction. Summaries of the capital improvement programs and certain recurring grant programs are included in the *2010 Annual Operating Budget*.

## THE BUDGET PROCESS

Allocation of revenues is determined through the budget process. This process begins with the presentation by the Mayor-President (Mayor) of his goals and objectives for the City-Parish. Departments then formulate departmental goals consistent with those of the City-Parish as a whole and submit their budget requests to the Mayor. The Mayor reviews these requests with his staff, department personnel, and representatives of the Metropolitan Council (Council). After considering the needs of the community, established policies, current financial conditions, and the forecasted economy, the Mayor formally proposes operating budgets to the Council for all operations that require such budgets. The Council then considers the Mayor's proposals, holds public hearings, and enacts final budgets, which may be different from those originally proposed by the Mayor. These annual budgets become effective on January 1.

Responsibility for the administration of the annual operating budget is shared by the Mayor, through the Chief Administrative Officer, the Finance Director, and the staff of the Finance Department-Budgeting Division; and the Metropolitan Council, through the Council Administrator-Treasurer and the Council Budget Officer.

## GENERAL OPERATIONS (GENERAL FUND)

As shown in the chart below, the 2010 budget for general operations, amounting to \$283 million, is financed primarily through sales, property, and gross receipts taxes on public utilities:

### SOURCE OF FUNDS

The following chart shows the functions for which general operations money will be spent in 2010:

### USE OF FUNDS

## SPECIAL OPERATIONS (SPECIAL FUNDS):

About 40% of the spending authorized in the annual operating budgets relates to the budget for general operations discussed in the preceding section. The remaining authorized spending pertains to the smaller budgets for special operations or activities. The most common reason for having separate budgets for these activities is that the revenues supporting them are legally dedicated to a specific purpose. Programs funded through these special budgets include:

- Fire protection for rural areas
- Pay enhancements for City firefighters
- Downtown Development District
- Mosquito Abatement and Rodent Control
- Operation of the Library system
- Street maintenance programs
- Emergency Medical Services
- EBR Parish Communications District
- Road lighting for rural areas
- Animal Control & Rescue Center
- Operation of the Baton Rouge River Center and parking facilities
- Repayment of long-term debt
- Operation of sewerage systems
- Solid waste collection
- Operation of the sanitary landfill
- Operation of the local Airport
- Support for the City Constable
- Provision of social services
- Employment training and opportunities
- Community and economic development
- Gaming enforcement services
- Equipment repair and maintenance
- Equipment replacement
- Employees' retirement funds
- Crime prevention districts

## 2010 FUNDING HIGHLIGHTS

Among the more noteworthy features of the 2010 budgets are the following:

- The economy of our area has remained strong through the national recession, and Baton Rouge was ranked as having the 6<sup>th</sup> strongest economy out of 100 major U.S. cities in the 2<sup>nd</sup> quarter of 2009.
- In spite of the strength of our economy, the City-Parish has taken a conservative approach to budgeting revenues. The 2010 budget assumes a 1% growth rate in sales and use taxes, our largest source of revenue.
- The Police Department's new Robinson R-44 helicopter will begin flying missions and air patrol in early 2010. Its operation is expected to greatly enhance the safety of citizens and law enforcement officers.
- The Fire Department has six fire stations at various stages of construction, and approximately \$12 million has been appropriated for the purchase of land and for the design and construction of these stations.
- Due to increasing health care costs, insurance benefits for employees were reevaluated during 2009. Existing plans were updated, and a High Deductible Health Plan is being offered in 2010 for the first time, with the option to participate in a Health Savings Account. Also, employees who choose the HMO or Point-of-Service plan may open a Flexible Spending Account. Both of these new accounts allow the use of pre-tax wages to pay for medical costs.
- The Emergency Medical Services Department has met and maintained the

“gold standard” set by the ambulance industry and continues to provide high-quality patient care with programs such as the Telemedicine Program, which allows the transfer of medical information through the use of voice, video, and data between two locations.

- The new building for the 19<sup>th</sup> Judicial District Court is expected to open in the summer of 2010, and funding in the amount of \$973,000 is budgeted for one-half year of expenses for that building.

### CONCLUSION:

The high quality of our budget is evidenced by our receipt of the Distinguished Budget Presentation Award of the Government Finance Officers Association of the United States and Canada (GFOA) for our budgets for each year from 1991 through 2009. This is the highest form of recognition in governmental budgeting, and we hope to win this honor again in 2010.

I would sincerely appreciate any comments from the citizens of our community relative to the budget. All citizens are invited to attend the budget hearings held in November and December of each year. Anyone interested in attending should contact the Finance Department at 389-3061 or the Council Budget Office at 389-3051 in early November of each year to obtain the schedule.

Melvin L. “Kip” Holden  
Mayor-President
