Zone A Areas of 100-Year flood; base flood elevations and flood hazard factors not determined.

Zone AE Areas of 100-Year flood; base flood elevations and flood hazard factors determined.

Zone B/X Areas between limits of the 100-Year flood and 500 Year flood or certain areas subject to 100-Year flooding with average depth less than one foot.

Zone C/X Areas of minimal flooding.

Footnotes:

1 Professional Engineer, Registered Architect, Professional Land Surveyor

2 Flood Hazard Factor

3 Letter of Map Amendment

4 Letter of Map Revision

COMPLETING THE FLOOD ZONE DETERMINATION FORM

The City-Parish Flood Ordinance requires that you first complete **Section A** of the Flood Zone Determination Form prior to applying for a building permit. This process will determine the lowest elevation at which you may construct your floor.

Completing Your (the owner) Section

1. Provide a plot plan and complete Section A of the Flood Zone Determination Form.
2. Section B will be completed by the Permit and Inspection Division. We will forward it to the DPW Engineering Division for further processing.
3. You will be notified by your selected professional (the individual you named on Section A of the form) when the lowest floor elevation has been determined.
