The Earth Machine™

North America's best-selling backyard composter.

Norseman Plastics has designed a durable backyard composter to keep moisture in and unwanted critters out. The Earth Machine™'s attractive conical design creates optimal composting conditions, with no corners for material to dry out, and allows easy lifting for access to the entire pile.

Doing the right thing couldn't be easier . . .

The Earth Machine™ produces an all-natural soil conditioner, which provides gardens with much needed nutrients, while helping to retain moisture in the soil. The result is significantly higher yields, with a substantial reduction in soil erosion.

FEATURES

- Large capacity (80 gallon or 10 cubic feet)
- Made from recycled plastic
- Easy snap together assembly
- Durable and lightweight (16 pounds) design

SYSTEMN Rain Barrel

Announcing the new SYSTEMN Rain Barrel from Norseman!

Conserve municipal water supply and cut household water bills by up to 40%. Rain water, free from chlorine and water treatment chemicals, is an excellent water source for lawns, plants and gardens. The use of rain barrels lowers municipal water demands and saves energy at water treatment facilities by reducing water pollution and storm water runoff.

FEATURES

- Unique shape and neutral color blends into any garden-scape
- 208 litre / 55 gallon capacity
- 34" tall and 26.1" in diameter
- Constructed of up to 50% recycled materials
- Mosquito mesh keeps bugs and leaf debris out
- Lid is screwed onto base for added safety
- Easily accommodates existing downspouts
- Overflow hose can be linked to another SYSTEMN or can be directed away from the house
- Contoured, easy-to-use spigot
- Installation instructions, spigot, screws, overflow hose and clamp included
- 5-year warranty
- Fits into most vehicles
